Last update: Tuesday March 9, 2010 ComBBAT 21 gets ready for Florida Regional

March 03, 2010

ComBBAT21 is getting ready for the Florida Regionals at UCF, Competition days:

- March 11 departure @ 7:15 am
- March 12 departure @ 7:30 am
- March 13 departure @ 7:30 am

Because the entrance is free, everyone is welcome to have fun and attend to the best robotic competition, to all team members: if you are going to attend to the Florida Regional, please turn in the Parent Permission form to Mr. White by Tuesday, March 9, or before if possible, if you haven't get the form yet, then hurry up and go to Mr. White's room and get it now that you still have time.

Daniel Cuesta Our Multimedia Needs your Help

March 02, 2010

We have started adding images and videos to our website, to show and teach better about our team history. We are in need of pictures and videos for various years. Any pictures you have please send them to multimedia@combbat21.com, and note the year the pictures were taken. A Zipped file would be appreciated.

[Click on Image Gallery](#) or videos and look around!

Thanks!

2010: Robot's Name

February 12, 2010

the 2010 robot was christened with a name. The name is "Mia" after the prolific soccer player on the Olympic Gold Medal US Team, Mia Hamm.

There were nearly as many mentors as team members Saturday morning. Therefore, attendance will be taken daily with the compilation being used for those who will qualify for the trip to Raleigh North Carolina.

Daniel Cuesta 2010 First Robotics Build Season

January 11, 2010

Attention students.

Combbat 21 is looking for students and people wishing to give their valueable time to help build and support the First Robotics Combbat 21 team. Brevard students from Titusville High School and Astronaut High School can join as members participating in the 2010 First Robotics Competition. Students can join our team at any time and can start learning how to build, design, operate, and work safely with our team. We also work with software programs like 3d Studio Max, AutoCAD, and robot program software that anyone can learn and operate, if interested.

Team 21 has already started working on our 2010 build season that last six weeks for building our robot for competition after sending the robot. First operates under gracious professionalism among many teams and High schools around the World. Combbat 21 has a lot spirit before, during, and after competition. We'll graciously help out any team, student, or organization that would like some support by team 21.

Anyone interested in joining should email our VP at ian@combbat21.com, and or meet us in Mr. White's Drafting room 132 at AHS on Monday-Thursday from 4-7pm and Saturday from 9am-1pm.

GO COMBBAT 21! -Expired-

Ryan Hill 2010 Kickoff - Saturday, January 9, 2010

January 1, 2010

FRC Team 21 always welcomes new members, and High school students interested in participating in the 2010 First Robotics Competition should email our VP at ian@combat21.com or attend our two pre-kickoff meetings in the Astronaut High School Drafting Lab January 5th & 7th from 3:30-4:00 PM. Current members should not forget to turn in your out-of-school-event consent form before the 7th!

The Saturday Kickoff marks the beginning of the design and build season. Whether it's the NASA-televised event in Manchester, New Hampshire or one of the numerous "local" Kickoffs, teams have the opportunity to meet with others to compare notes, get ideas, make friends, find mentoring teams, pick up the Kit of Parts, and get geared up for the exciting competition season!

See ya at the kickoff!

Who dat bat?
ComBBAT! Ian
