The Home Stretch!!!

Please make sure you are attending the meetings as there are only 8 left. We are almost done with the 2015 build season and would like everyone to be here as we are finishing up. You also need to make sure you have all your paper work turned in for the regional competitions.

We have the **parent meeting on 2/14 at 1:00** where we will discuss our trip to South Florida departure times and return times and any question you may have. The **"Parent Permission"** forms and the **\$60 payment** for South Florida and Orlando need to be turned in. They are now past due. Checks need to be made out to Astronaut High School / Robotics Club and can be turned into the school bookkeeper who will write a receipt.

Media:

If you have any photos from past years or this year from robotics send them to Madison so she can use them. **MEDIA PEOPLE, SEE CLARA ASAP!**

Who Wants To Be Team Mascot

Start getting your costumes together. Try to get them done soon. If you need help, recruit other team members who aren't doing anything at the moment.

Robot Update

The frame, drive system, and lifting mechanism are all complete and we are in the testing phase of building the robot. The bin handler design is being optimized for the best operability. We have made quite a progress these last few weeks and we are planning to practice driving this Saturday.

FUNDRAISING

In order to go to the competitions we want to go to this year, we need money. If you have any fundraising ideas contact Beth Kline☺. (Competition dates will be posted on the webpage: www.combat21.com).

BUTTONS

We have very nice new button designs. If you would like to have a button making party contact Clara to start making plans.
